ALLOWANCE

1. Claims 1-30 are allowed.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In a telephone discussion dated November 19, 2007, Applicant gave Examiner authorization for this Examiner's Amendment.

The Application has been amended as follows:

Specification: AMENDED: On page 1, after the title, insert the following new heading:

FIELD OF THE INVENTION

Specification: AMENDED: On page 1, before the second full paragraph, which begins with "Photocurable compositions are cured," insert the following new heading:

BACKGROUND OF THE INVENTION

Specification: AMENDED: On page 2, before the first paragraph, which begins with "Thus, the present invention," insert the following new heading:

SUMMARY OF THE INVENTION

Specification: AMENDED: On page 3, before the fourth full paragraph, which begins with "In one embodiment of the present invention," insert the following:

BRIEF DESCRIPTION OF THE DRAWINGS

Fig. 1 is a graph of light absorbance of photoinitiator components as a function of wavelength of the UV region.

DETAILED DESCRIPTION OF THE INVENTION

Specification: AMENDED: On page 17, replace the last paragraph with the following:

An additional ink was prepared using a photoinitiator composition of 35% of Example 4, 35% of Example 6 and 30% EHA, with the use of these two types of this compound class giving good light absorbance across the whole UV region, as shown in Fig. 1. Despite high levels of these piperazine derivatives, this ink required approximately 12 passes to cure at half power and 4 passes at full power. This result confirms that, although the products of this invention have some photoinitiator activity, the bulk of their benefit derives from their ability to sensitize benzophenone and benzophenone derivatives.

Reasons for Allowance

3. The following is an Examiner's statement of reasons for allowance: The elected invention is free of the prior art. The closest prior art with respect to the present invention is Ohwa, et al., U.S. Patent No. 6,022,906. Ohwa et al. teaches α -aminoacetophenone photoinitiator compounds very similar to the compounds of the allowed claims, but the exemplified compounds of the reference contain either morpholine or piperidine whereas the compounds of the instant invention require piperazine instead.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 1624

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
